Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-15 and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bell et al., US Pat. No. 4,136,458 (Bell).

3. Bell discloses the invention as claimed where: **41** and **42** are first and second members; **43** and **44** are dampers connected to the members in the manner claimed; elements **56** and **57** cooperate to align the members with respect to each other; **38** is a piston associated with the damper in the housing **21**; **60** is a guide pin that passes through a recess; and the each member may be considered to be a “retaining module” or a “task module” in the manner as claimed.

### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bell in view of Enderle et al., US Pat. No. 5,041,806 (Enderle).

Art Unit: 2859

6. Bell discloses the invention substantially as claimed. However, Bell does not disclose the magnetic means as claimed. Enderle discloses how magnetic means **19** may be used for the purpose of holding probe components together in an operating position. Therefore, it would have been obvious at the time the invention was made for one of ordinary skill in the art to use the magnetic means as taught by Enderle in conjunction with the probe of Bell for the purpose of holding the probe components of Bell together in an operating position.

7. Claims 3 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bell in view of Ichiba et al., US Pat. No. 5,259,122 (Ichiba).

8. Bell discloses the invention substantially as claimed. However, Bell does not disclose the viscous fluid as claimed. Ichiba discloses how a viscous liquid **19** may be used for the purpose of further damping a probe. Therefore, it would have been obvious at the time the invention was made for one of ordinary skill in the art to use the viscous liquid as taught by Ichiba in conjunction with the probe of Bell for the purpose of holding further damping the movements of the Bell device.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
